EXECUTIVE SUMMARY

- I'm an aspiring web developer eager for an entry-level role where I can blend creativity with logical problem-solving to build responsive, user-friendly websites.
- I thrive on crafting clean, well-structured layouts that turn real-world challenges into elegant digital solutions, and I'm committed to continuous learning in a collaborative team environment.
- Motivated by curiosity and clear communication, I aim to sharpen my skills while delivering tangible value to both users and my organization.

SKILLS

- **Web Technologies:** HTML, CSS, JavaScript
- **Design Tools & Styling:** Tailwind CSS, Responsive Design, UI/UX (Basics)
- **Languages:** Python, Java, Node.js (Basics)
- **Platforms:** Visual Studio Code, Git, GitHub, Figma
- **Soft Skills:** Problem-Solving, Teamwork, Communication, Time Management

PROJECTS

Medicare – Hospitals Website | *HTML, CSS, JavaScript, Animate.css, Slick Slider* | *LINK*   JUNE 2025

- Developed a fully responsive hospital website with modern UI, optimized for all screen sizes using HTML, CSS, and media queries.
- Created interactive components including sticky header, appointment booking form with doctor filter, and scroll animations using JavaScript.
- Integrated libraries like Slick Slider for testimonials and Animate.css for smooth scroll effects to enhance user engagement.
- Designed modular sections such as services, doctor profiles, blog, and contact form using component-based layout and reusable styles.

Trip Booking – Travel Website | HTML, CSS, JavaScript | LINK   MAY 2025

- Designed a fully responsive travel booking website with a modern UI, smooth animations, and themed layouts across all screen sizes.
- Built multiple pages including Home, Destinations, Offers, Bookings, and Login, using reusable components and hover effects.
- Implemented booking form with summary and payment options, and real-time countdown timers for travel offers using JavaScript.
- Applied scroll animations, interactive filters, and form handling techniques to enhance user experience and frontend skills.

EDUCATION

Presidency College   Chennai, Tamil Nadu
Bachelor of Science in Mathematics   2022 – 2025

CERTIFICATIONS

Introduction to Software Engineering (IBM) | Certificate   JUNE 2025

- Gained foundational knowledge of SDLC, including Agile and Waterfall methodologies.
- Built a strong base in software engineering principles and real-world development practices.

Front-End Development (META) | Certificate   JUNE 2025

- Gained hands-on experience in HTML, CSS, JavaScript, DOM manipulation, and modern tools like Bootstrap and React (Intro).
- Built lab-based projects focusing on responsive design, UI basics, and interactive web applications using real-world scenarios.

Back-End Development (META) | Certificate   JUNE 2025

- Gained hands-on experience in Full-Stack Web Development using Django, SQL, HTML, CSS, Bootstrap, and API integration.
- Built and deployed a real-time web application, managing both front-end and back-end logic, data flow, and user interactions.
